PROFILE

Full-stack engineer with 5+ years of experience building scalable web and mobile applications across fintech, insurance and health-tech. I build products end to end: React and Next.js on the web, React Native on mobile, and NestJS or .NET services on PostgreSQL and SQL Server behind them.

Full-time at Leadway Assurance since 2021, alongside contract work on fintech and marketplace products. Proven track record of delivering high-impact solutions, optimising performance and leading third-party integrations, from concept to production.

EXPERIENCE

Software Engineer
Dec 2021 – Present

Leadway Assurance Full-time · Lagos, Nigeria

- Built LeadwayOne in React Native and Expo: one app for Leadway's insurance, pension, investment and health products on iOS and Android.
- Built the Leadway Health enrollee app (100K+ installs on Google Play) for appointments, claims and health plans.
- Delivered the multi-tenant Corporate Portal end to end (React, ASP.NET, MSSQL), where client HR teams manage members, claims analytics and invoices.
- Built online plan sales on the Leadway Health website (PHP, jQuery): multi-step purchase flows with Paystack and Payfi checkout.
- Led integration of payment gateways and security providers, improving transaction reliability and system interoperability.
- Identified and resolved performance bottlenecks in legacy systems, improving responsiveness and reducing system errors.

Full-Stack Engineer
Aug 2026 – Present

Flipxer Contract · Remote

- Building Flipxer, a Nigerian crypto exchange, across the React and TypeScript web app and the NestJS and PostgreSQL backend.
- Delivering trading across 12 assets, naira deposits and payouts, BVN/NIN KYC, and 2FA- and PIN-protected withdrawals.
- Testing with Jest and shipping through CI/CD pipelines on GitHub Actions.

Mobile Application Developer
Nov 2024 – Present

Prosplug Contract · Warlingham, England · Remote

- Developing and scaling the Prosplug marketplace app for iOS and Android in React Native and TypeScript, with a focus on performance, usability and maintainability.
- Improved UI/UX and reduced latency through optimised rendering and efficient state management.
- Shipping tested releases (Jest, React Native Testing Library) with a distributed team in an agile environment.

Software Engineer
Jan 2023 – Present

Palm Inventive Freelance · Remote

- Built and maintain CommTB, an offline-first React Native app for field health workers in low-connectivity environments.
- Designed and implemented data synchronisation strategies ensuring consistency across devices and servers.
- Iterated on product features with stakeholders based on real-world usage feedback.
